

Fast Track to Cloud with Rubrik Accelerator for Microsoft Azure

Manage All Your Microsoft Apps on One Platform. From On-prem to Azure.

As you look to implement a cloud strategy with Microsoft Azure, you need a single solution to protect and manage data across on-premises and cloud. With Rubrik Accelerator for Microsoft Azure, you can simplify backup and recovery, deliver automation at scale, and accelerate your cloud journey. As a result, unlock Azure for cost-effective long-term retention, disaster recovery, and application test and development. Rubrik Accelerator for Microsoft Azure boosts Rubrik's breadth of offerings for Microsoft customers, including automated data protection for Hyper-V and Office 365, support for physical and virtual Windows, and instant database recoveries with SQL Live Mount.

MANAGEMENT SIMPLICITY

Automate backup, recovery, and archival schedules to Azure via one SLA policy engine with just a few clicks.

FAST RECOVERY WITH INSTANT ACCESS

Instantly locate files with predictive search, even in Azure. Recover SQL databases in minutes with Live Mount.

APPLICATION MOBILITY

Easily migrate apps to Azure for long-term retention, test/dev, or DR with one software fabric across on-prem to Azure.

OFFERING OVERVIEW

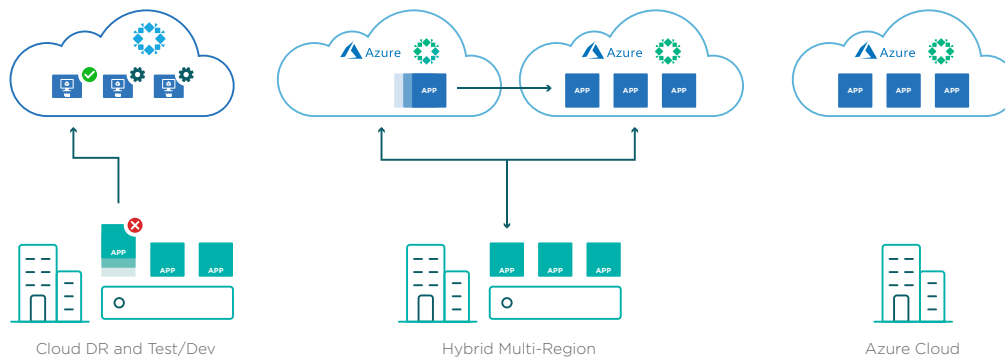

Rubrik Accelerator for Microsoft Azure delivers all of the tools and services you need to protect, manage, and secure data from on-premises to Azure.

- **Rubrik Cloud Data Management Platform:** Rubrik delivers an all-in-one software platform for backup, disaster recovery, replication, and data archival across on-prem to Azure. Rubrik consolidates disparate hardware and software components that comprise legacy architecture into a single software.
- **Free Azure*:** New users receive 6 months of free Azure*. Easily protect, archive and instantiate your applications in Azure with cost-effective, durable, and globally available cloud storage.
- **Free CloudOn:** Rubrik provides 12 months of free CloudOn services. With CloudOn, you can leverage Azure to archive data and instantiate applications for test/dev or DR.

AZURE SOLUTIONS

Whether it's on-prem or in Azure, Rubrik powers on apps for recovery, search, analytics, and test/dev. Deploy Rubrik on-prem via plug-and-play appliances or as software. Replicate your on-prem apps and data to Azure. Quickly spin up apps in Azure as a cost-effective DR solution or for test/dev.

* Delivery of free Azure shall be the sole responsibility of Microsoft and subject to Microsoft's terms and conditions.

KEY FEATURES

Cloud Instantiation for DR and Test/Dev	Instantiate your applications on Azure for test/dev or DR to save on secondary DR site spending. Rubrik automates the conversion of application data (VHD) into Azure Virtual Machines. Rubrik has designed a lightweight architecture to save on cloud compute costs.
Data Archival	Store your application data in Azure blob storage for long-term retention. Rubrik delivers incremental-forever cloud archival for faster recoveries and lower costs. All data is encrypted at-rest and in-flight, whether it is on-premises or in Azure.
Policy-based Automation	Automate backup, recovery, and archival schedules with one SLA policy engine across on-prem to Azure. Reduce daily management time from hours to minutes.
Global Predictive Search	Ensure instant accessibility of archived data with real-time predictive search. Search for files across all snapshots with suggested search results as you type.
SQL Live Mount	Deliver near-zero RTOs by mounting SQL directly on Rubrik. Recover down to a single object or table in seconds. Provide multiple SQL copies to developers without impacting production or provisioning additional storage.
API-first Architecture	Automate all aspects of data lifecycle management with full-featured RESTful APIs. Move local data to Azure and intelligently manage Azure data to reflect business needs.
Immutability for Ransomware	Recover quickly from Ransomware by reverting to any point-in-time snapshot. All applications and data are stored in an immutable format, preventing Ransomware from accessing and encrypting underlying backups.

“With Rubrik and Azure, we were able to transform the sprawling legacy systems and infrastructure of three hospitals into a dynamic, consistent, and centralized hybrid cloud environment. As a result, my team achieved 8x faster backup performance and 50% hard cost savings. This accelerator will be a huge value-add for IT teams looking to move to the cloud and simplify their operations.”

Lev Goronshteyn
Chief Technology Officer
CarePoint Health

“At Berkeley, we embrace cloud-based technologies for redundancy, replication, high availability, and data protection. Rubrik fit right into that mix. With Rubrik, we could eliminate tape, integrate seamlessly with Azure, and securely mobilize our applications from on-premises to the cloud. Together, Rubrik and Azure helps us decrease costs, stay within our data retention policy, and establish a stronger DR strategy.”

Joseph Pagano
Director of Infrastructure
Berkeley College
